### INTERNET & ITS APPLICATIONS

- E-mail: Email, short for "electronic mail," is one of the most widely used features of the Internet, along with the web. It allows you to send and receive messages to and from anyone with an email address, anywhere in the world.

### INTERNET & ITS APPLICATIONS

- An Internet application does something for end users. It is generally not concerned with how data is actually transmitted between the hosts. Here are some distributed applications that require well-defined application level protocols
