REPORT

Financial System plays an important role in the development of an economy. It is a mix of Financial Markets, Institutes, Instruments and Services. It mobilizes the funds from surplus units to deficit units. Recently, the education in accounting, commerce and management studies are growing rigorously, especially in the stream of finance specialization.

Now-a-days, with the growing importance in commerce and management education, they must have a basic awareness in conceptual and practical aspects of investment avenues, financial derivatives, and risk management irrespective of their area of study due to their growing personal needs on one side and increasing complexity in the marketplace on the other side. Students desire for a qualitative lifestyle, aspiring freedom and flexibility in financial decisions. Acquiring sound financial knowledge and awareness in products and their risks and return patterns moulds the student as a rational financial decision maker. Awareness on financial products enables students turning savers to browse the financial world, make rational financial decisions and minimize the chances of being misled in financial markets. Lack of awareness in financial products at the early age of life, sometimes may lead to a financial hardship, increased isolation, emotional stress, and lower self-confidence.

The study creating awareness in financial products will be a step forward in research among commerce and management disciplines in common. It focuses towards increasing the level of awareness by suggesting supportive measures.

In this context, a Special Lecture on Stock Market was organized by the department of Commerce and Management, Smt. Veeramma Gangasiri Degree College for Women, Kalaburagi on 2nd February, 2022 at 2 PM in the College Auditorium.

The students of B Com and BBA actively participated in the Special Lecture.
